## IMPROVE PRODUCTIVITY AND ACCURACY

### > Anywhere, anytime

Remotely access files, applications and data from any location within the wireless infrastructure with integrated 802.11b/g connectivity.

### > Maximise ROI

With ViewSonic's Visual Solutions Developer Tools CD-ROM software (available separately), improve productivity and ROI by developing applications specific to your business, then deploy them on the V212 display.

### > Customise applications

The V212 is an open platform for development with Microsoft® CE.NET Framework. The optional speaker and magnetic stripe reader let you adapt the V212 for numerous vertical applications.

### > Real-time access to information

Experience always-on, anytime mobile connectivity to your business PC within your wireless infrastructure and enjoy instant access to email, internet files or corporate data with the tap of a stylus.

### > Encourage mobility

Integrated networking support for 802.11b/g wireless LANs; access to WANs and PANs via optional CF cards.

### > Improve productivity

Access email and corporate databases remotely with optional connectivity accessories. Input information into your V212 and have it instantly stored on your networked PC.
