

Why full EPoS?

Full EPoS V's PC based solution

1. Integration

With a full EPoS terminal you have integration options e.g. peripheral options; built in printer, Customer display unit that you do not get with a PC based solution.

2. Specific manufacturing

EPoS terminals are built to withstand retail environments. They are built to last. Carefully selected processor and components are chosen to substantially increase reliability and longevity.

3. Enhanced connectivity

There is also enhanced connectivity associated with a terminal such as access to ten peripheral ports on the unit. Ports are limited on PC solutions.

4. Flexible specification

Speed of ordering, implementation of loyalty schemes with their multimedia capability and dual screen options.

5. Aesthetic reasons

The aesthetics at the point of sale is becoming more and more important to retailers. All in one terminals look contemporary and stylish at the point of sale more so than a PC based terminal.

6. Proven success of terminals

EPoS terminals are built to last and their track record and success rate worldwide are testaments to their reliability and versatility.

7. Touchscreen solution

Latest and fastest touchscreen technology included with POS terminals. High durability, scratch and water resistant. Clear and easy-to-read, its so intuitive that transactions can be processed more quickly reducing queue times and improving customer service.
