Introducing the latest in touchscreen technology

The IR Touch

Infrared Touch Technology

What is Infrared Touch Technology?

An array of vertical and horizontal IR sensors that detect the interruption of a modulated light beam near the surface of the screen.

It is the only technology that does not rely on an overlay to register a touch, so it's impossible to physically "wear out" the touchscreen.

The IR touch uses a small frame around the display with LED's hidden behind the IR screen. The controller sequentially pulses the LED's to create a grid of IR light beams.

What are the benefits?

- Twice the life span of resistive touch screens
- Withstands severe environments
- The IR touch screen has the most durable surfaces
- Abrasion-resistant screens, ideal for rugged applications
- Choice of filter type or overlay for system protection and optimal optics
- Touch with a finger, gloved hand, fingernail, or stylus, it delivers a fast, accurate response every time.

PC Cubed Ltd
Distributor of EPoS and Mobility Hardware

EPoS Hardware

WHY PC CUBED?

Quality: PC Cubed distributes top quality EPoS and Mobility hardware from Europe, America and the Far East to provide ideal hardware platforms for our Reseller partners throughout Ireland. Configuring complete systems to our partner's specifications.

Local: Stock Holding - Technical Support - Maintenance. Allows PC Cubed to offer unrivalled levels of service. PC Cubed is Ireland's only authorised repair centre for 'Epson' retail products, 'Metrologic' bar code scanners and 'Javelin' plastic card printers. PC Cubed are also a WEEE Compliant Company.

Range of Products: Partnering with cutting edge manufacturers enables PC Cubed to provide a comprehensive range of hardware solutions to our installers.

Cost Effective: Recognising that 'cost of ownership' is vital in accessing product appeal. PC Cubed's rigorous tests ensure only the most hardwearing and reliable solutions are offered to its partners, reducing maintenance and raising end user service satisfaction.

Dedicated Demonstration Room: The room provides our customers with an area specifically devoted to exhibiting hardware options. The use of this area is free, and enables installers to demonstrate hardware options to end-users in a purpose built environment. This service has enabled PC Cubed to work as a catalyst in securing deals between our customer and their end users.

Service Orientated: The service chain for PC Cubed starts internally with our employees. Members of staff are trained where appropriate giving them the tools to deal with customer queries and call backs leading to a quicker response to any questions customers may have.
