

### ***New Product Launch at PC Cubed***

**PC Cubed, specialist hardware distributor, has launched the latest edition to their EPoS Touch Terminals – The Posiflex Jiva Terminal**

Run demanding applications with the Posiflex Jiva and its powerful 2GHz Celeron processor! Retail, restaurant, bar & nightclub and other hospitality applications will benefit from the Jiva tough, spill-proof design and bright, easy to read 15" LCD panel. The panel is available in both resistive and scratch-resistant infra-red interfaces. The Jiva features 256 or 512 MB of memory, a primary hard drive and space for an optional UPS battery. The all in one touch terminal is a great solution for any front end workstation that needs performance and durability. The Integrated UPS system protects the Jiva from power failures.

The Jiva Series is the latest and most powerful all in one workstation from Posiflex. Its compact space saving form makes it a great solution for hospitality, retail and vertical markets. It is available with Windows XP, Windows 2000, or no operating system pre-loaded.

Posiflex International Ltd., the sole designers and manufacturers of the POSIFLEX product range, have been at the forefront in the design and manufacture of POS technology for the last decade. PC Cubed only offer the most innovative, stylish, robust and ergonomically designed products which are all on offer with the New Posiflex terminals.

PC Cubed will launch the product at this years ICT Expo taking place on the 4<sup>th</sup> and 5<sup>th</sup> May in the RDS.
